

01 // PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer with extensive experience architecting and shipping reliable, scalable web applications, real-time engines, and RESTful APIs. Proficient across the entire software development lifecycle with deep expertise in **Python, Django, Django Channels (WebSockets), JavaScript, HTMX, Docker, and PostgreSQL**. Proven track record of turning complex operational challenges into elegant, production-grade applications with a strong focus on clean system architecture, data security, and seamless user experiences.

02 // TECHNICAL SKILLS & STACK

Languages:

PythonJavaScript (ES6+)SQLHTML5

CSS3JavaC/C++

Data & Cache:

PostgreSQLSQLiteRedis

ORM Optimization

APIs & Integrations:

Paystack Payment GatewayTesseract OCRTesseract OCR

Poppler PDF EngineJWT & Session AuthRESTful API DesignPostman

Backend & Web:

DjangoDjango REST Framework

Django ChannelsFlaskHTMXWebSockets

DevOps & Cloud:

DockerGoogle Cloud RunRenderFly.io

Linux / VPSGit / GitHub

Nginx / Unicorn

03 // WORK EXPERIENCE

Full Stack Developer • **Helix Mind Start-Up**

2023 – Present

Architected and delivered scalable, full-stack web applications and robust backend APIs utilizing **Django, Python, JavaScript, and SQL**.

Implemented secure authentication workflows, role-based access control (RBAC), and efficient database models, boosting query speeds and throughput.

Engineered interactive front-end interfaces, internal administrative dashboards, and client-facing tools using modern CSS and modular JavaScript.

Collaborated with agile engineering teams in high-pressure development sprints, ensuring clean git workflows, continuous testing, and rapid feature deployment.

04 // FEATURED ENGINEERING PROJECTS

The Truth Gate

Live Demo ↗GitHub ↗

Django 5 · Channels · Redis · WebSockets · PostgreSQL · Paystack

Institutional-grade platform with real-time private counselling via WebSocket channels, filtered sermon catalog, community testimonies moderation, and automated Paystack payments.

Trade With Ariel

Live Demo ↗GitHub ↗

Django · Python · Glassmorphic CSS · Vanilla JS · Render

High-conversion fintech brand portal featuring custom glassmorphism design and a bespoke Django CMS backend powering live mentorship tiers, analytics, and offers.

SubDoc (PDF-to-Word Engine)

Live Demo ↗GitHub ↗

Flask · Python · Docker · Tesseract OCR · Google Cloud Run

Stateless, privacy-centric document conversion engine equipped with Tesseract OCR fallback for scanned PDFs, drag-and-drop UI, and serverless Cloud Run containerization.

AU Voting & Election Platform

Live Demo ↗GitHub ↗

Django · SQLite · Bootstrap 5 · Python · Vercel

Secure election portal facilitating multi-candidate management, dynamic vote verification, real-time ballot aggregation, and tamper-resistant audit reporting.

Django REST API & Admin CMS

Live Demo ↗GitHub ↗

Django REST Framework · HTMX · SQLite · CSS · Render

Modular RESTful API ecosystem featuring granular permission schemas, Token authentication, CRUD endpoints, and lightweight reactive HTMX frontend interfaces.

VA Brand Showcase Platform

Live Demo ↗GitHub ↗

HTML5 · CSS3 · Modern JavaScript · Fly.io

Sleek client portfolio website featuring booking integration, interactive service showcases, responsive customer testimonial carousels, and global CDN delivery.

05 // EDUCATION & CERTIFICATIONS

Bachelor of Science (B.Sc.) in Computer Science

Undergraduate Program

In Progress

Certifications & Credentials

Full Stack Development – Udemy

Web Development Specialist – Programming Hub

06 // HONORS & ACHIEVEMENTS

4th Place – National Hackathon

Recognized for innovative problem-solving, rapid prototyping, and delivering clean, production-ready full-stack software.

Rapid Prototyping & Agile Commendation

Commended for agile feature delivery, sprint collaboration, and translating product specifications into functional codebases.
